Positive Planet

Winter 2021

Volume 3.0

Planet Protectors

@planetprotectors_ca

ow! I am super happy that the magazine has gotten this far. I honestly thought that I would just loose interest in this or that I would be too busy to write this but I seem to have been proven differently. When I first started this magazine we were all in lockdown and I had much more time on my hands to write this. For the second issue it was summer vacation and there was endless time to write it. Now on the third issue there is not as much time to write this. So as you might have noticed some these topics have been taken from the Planet Protectors Live Stream. Well I hope that you enjoy this issue and remember to stay eco.

- BLAKE

Sloths used to be giant creatures. They were called prehistoric ground sloths that lived across the americas. Some of the sloths were the size of a cat but others were ginormous. The huge ones were called Megatherium and they weighed as much as an elephant!!! Overtime they became extinct and now there are only 6 different species of sloths, including the three toed sloth and more. Now let's talk about why they are so slow. The answer is... their diet. They eat mainly leaves and those don't provide a whole lot of energy and sloths could be digesting things for up to a few weeks not like humans where it can all go through in a day. They also try not to use energy very often so if they need to go somewhere they just go slow. They spend a lot of their time sleeping, eating and resting. They only go down the tree once a week. That is

definitely a chill lifestyle.

DID YOU KNOW HOW ELECTRIC EELS CREATE ENERGY? THIS IS AN INTERESTING ONE. **ANOTHER FACT IS THAT** THESE EELS AREN'T THE ONLY ANIMAL ON THE **PLANET THAT GENERATE ELECTRICITY. MANY DIFFERENT SPECIES OF** FISH DO TOO. SO HOW **DOES IT WORK EXACTLY?** WELL THEIR BRAIN GIVES THEIR ELECTRIC ORGAN THROUGH THE NERVOUS SYSTEM TO WELL CREATE **ELECTRICITY. THEN THAT** SIGNAL ACTIVATES **HUNDREDS OR THOUSANDS OF DIFFERENT CELLS CALLED ELECTROLYTES. THESE ELECTROLYTES HAVE A DISC SHAPE AND PUSH OUT** POTASSIUM AND SODIUM ATOMS THAT HAVE A **POSITIVE CHARGE** (PUSHING THAT CHARGE **OUTSIDE OF THEIR BODY)** AND A NEGATIVE CHARGE (PUSHING THAT CHANGE INSIDE OF THEIR BODY).

Did you know how jellyfish sting? These stinging creatures are very interesting because they have the power to kill a person but are 95% water. So what is their secret??? Well since they are so delicate they rely on tiny venomous cells in the ocean for food and protection. These cells are called Cnidocytes (night-o-sites). All jellyfish have the ability to sting even the smallest ones. There is one species of jellyfish that has tentacles longer than a blue whale (the biggest whale out there that can be 30 meters). So let's say that your finger touches a tentacle... your finger opens a sac like thing that has the venom inside of it and sea water rushes in and then a microscopic harpoon that is barbed to be injected into your skin. Wow, that is crazy.

NEW INITIATIVE

PLANET PROTECTORS
PRESENTS

UNITED NATIONS SDG'S INITIATIVE

How Does it Work?

- 1. PARTICIPANTS WILL CHOOSE 8 OF 16 DIFFERENT GOALS

 (GOALS ARE DIVIDED INTO 2 DIFFERENT SECTIONS HUMAN

 AND ENVIONMENTAL) AFTER YOU CHOOSE THE GOALS YOU

 LOOK AT HOW YOU CAN HELP AND LOOK AT THE LINKS

 ATTACHED TO THE GOALS AND CHECK THEM OUT. ON THE

 LINKS THERE ARE DIFFERENT FACTS ABOUT THE ISSUE AND

 MULTIPLE SOLUTIONS TO THE ISSUES THAT YOU CAN

 PARTICIPATE IN.
- 2. AFTER PARTICIPANTS FIND OUT WHAT THEY CAN DO TO HELP THE PROBLEM THEY ARE ENCORAGED TO TRY SOME OF THOSE SOLUTIONS. IF THEY ARE NOT ABLE TO PATICIPATE IN THE SOLUTION THEY ARE ENCORAGED TO TRY A DIFFERNET ISSUE.

AFTER PARTICPANTS ARE DONE THEY CAN EMAIL
PLANETPROTECTORSCHALLENGES@GMAIL.COM AND WILL BE
ENTERED INTO A RAFFE TO GET 3 FREE BEESWAX WRAPS.
PARTICIPANTS CAN ALSO POST THEIR ACCOMPLISHMENTS ON
SOCIAL MEDIA USING THE HASTAG #PPUNSDGSINITIATIVE

HUMAN BASED GOALS

NO POVERTY

Donate items that you don't use anymore to the less fortunate

https://www.un.org/sustainabledevelopment/poverty/

GOOD HEALTH AND WELLBEING

Supporting you health by getting vaccinated and eating healthy

https://www.un.org/sustainabledevelopment/health/

QUALITY EDUCATION

Help educate children in and around your community and ask governments to make eduction a priority

https://www.un.org/sustainabledevelopment/education/

GENDER EQUALITY

Empower women and empower girls to ensure their equal rights

https://www.un.org/sustainabledevelopment/gender-equality/

D<u>ECENT WORK AND ECONOMIC GROWTH</u>

Create job opportunities for youth and creating more safety measures

https://www.un.org/sustainabledevelopment/economic-growth/

PEACE, JUSTICE AND STRANG INSTITUTIONS

Stand up for human rights

https://www.un.org/sustainabledevelopment/peace-justice/

PARTNERSHIPS IN THE GOALS (NOT PART OF THE CHALLENGE)

https://www.un.org/sustainabledevelopment/globalpartnerships/

INDUSTRIES, INNOVATION AND INFRASTRUCTURE

Help fund projects that contribute to a basic infrastructure and think about how infrastructure impacts you life

https://www.un.org/sustainabledevelopment/infrastructureindustrialization/

REDUCED INEQUALITIES

ENVIONMENTAL BASED GOALS

CLEAN WATER AND SANITATION

Save water by having shorter shower and not running the tap when brushing your teeth

https://www.un.org/sustainabledevelopment/water-and-sanitation/

AFFORDABLE AND CLEAN ENERGY

Turn off lights when you are not in a room and use energy efficient lights and appliances

https://www.un.org/sustainabledevelopment/energy/

ZERO HUNGER

Don't waste food and support local farmers

https://www.un.org/sustainabledevelopment/hunger/

LIFE BELOW WATER

Avoid using single use plastics by using reusable bags, straws etc.

https://www.un.org/sustainabledevelopment/oceans/

RESPONSABLE CONSUMPTION AND PRODUCTION

Recycle and buy gently used clothing

https://www.un.org/sustainabledevelopment/sustainable-consumptionproduction/

LIFE ON LAND

Plant trees or make a garden

https://www.un.org/sustainabledevelopment/biodiversity/

CLIMATE ACTION

Save energy, water and reduce greenhouse gas emissions

https://www.un.org/sustainabledevelopment/climate-change

SUSTAINABLE CITIES AND COMMUNITIES

Walk, bike or use public transportation
